

My system's response is indicated with ( )

Regular text: Good Night (normal text, OK)

Old Style Numbs: 1234567890 (old style nums, OK)

USING FONTSPEC +SMCP ENABLES SMALL CAPS: GOOD (SMALL CAPS, OK)

Textnormal macro works: Good Night (normal text, OK)

SMALL CAPS IS STILL ENABLED: GOOD (SMALL CAPS, OK)

Using fontspec -smcp disables small caps: Good 1234567890 (no small caps, OK; ordinary nums, not OK)

And Also Noting Here That The textsc Macro Does Not Work (normal text, not OK)

Using fontspec for +/- smcp disables the global old style nums: 1234567890 (ordinary nums, not OK)

Using fontspec +onum re-enables old style nums: 1234567890 (old style nums, OK)

The oldstylenums macro nevertheless does not work: 1234567890

USING FONTSPEC +SMCP;+ONUM RE-ENABLES SMALL CAPS AND OLD STYLE NUMS 1234567890
